FALL: IT'S PERFECT FOR PLANTING

Savvy gardeners make the most of this season by planting new areas and sprucing up existing beds and borders. Cooler temperatures and warm soils create perfect conditions for planting trees, shrubs and perennials. Prepare for next spring by planting this fall!

WATERING: Water in new plants thoroughly using root stimulator. A thorough watering every 5 to 7 days is usually sufficient to establish new plantings. Check the soil every few days for moisture to a depth of 6". If the soil is moist, do not water.

MULCH: 2 to 4" of mulch around new plantings helps retain moisture in the soil. To reduce weed growth, put down landscape fabric before applying mulch.

STAKING TREES: Staking larger trees after planting provides stability while the roots establish, especially in windy sites. Stakes can be removed after one complete growing season.

EUCALYPTUS FURNITURE

Brazilian eucalyptus wood is an environmentally friendly, dense hardwood that is prized for its strength and durability in all climates. It's naturally resistant to insects and decay, and requires minimal care to maintain its beauty.

The Danish stacking chair has a simple, clean design and stacks neatly for easy storage when not in use.

The 7-piece folding table and chairs set does not require assembly. The chairs fold and stack underneath the table and the table folds down into a compact unit for storage in the off season. A cover is available to protect the whole set.

BREEZESTA AVANTI DINING SET

Breezesta furniture is extremely durable and best of all, it's maintenance free. Each piece is made from 100% recycled poly lumber, which keeps hundreds of thousands of plastic jugs out of our landfills. The furniture is covered by a lifetime warranty against cracking, chipping, splintering, peeling, rotting, and insect infestation. Choose from our selection of styles and colors, or you can place a special order to create your own custom look. The possibilities are endless.

AGIO INTERNATIONAL LISBON CURVED SECTIONAL

The Lisbon three-piece sectional from Agio features a rust-free aluminum frame for ease of maintenance. The semi-rounded sectional includes beautiful wine-colored cushions and coordinating throw pillows. The optional round ottoman compliments the curve of the sectional sofa and doubles as a slatted coffee table with the cushion removed.

BULBS-STEPS FOR SUCCESS

SOIL IMPROVEMENT

Amending soil with compost or peat moss helps loosen heavy clay soils, and improves drainage and moisture retention.

FERTILIZE

Add a granular bulb fertilizer when planting to promote healthy root growth, sturdy foliage, and showy flowers.

WATER & MULCH

Water thoroughly after planting and occasionally during dry conditions. A light covering of mulch helps to conserve water in the soil.

PLANTING

Plant bulbs in groups or clusters for a maximum show of color, or scatter in drifts—planting where they fall for a more natural effect.

“And then my heart with pleasure fills... And dances with daffodils.”

MEET OUR EXPERTS

ZAIGA JOHNSON

Zaiga Johnson has been with us since 2001. As an active master gardener in Jefferson County for over 15 years, she continues to learn and broaden her knowledge—sharing it with our customers as one of our informative plant doctors. She has become an important part of the Echter's team, as an associate who can take on absolutely any project. Her co-workers appreciate her positive attitude, support, and how she works with customers.

Zaiga hails from Minnesota, and has lived in Colorado since 1976. She worked as a research microbiologist for 27 years, then decided to follow her love for plants.

A dog lover, she and her husband Roger have cared for over 200 dogs through their dog sitting business. She also enjoys spending time with her two children and four granddaughters. Living on over an acre of land, Zaiga grows tomatoes, peppers, and garlic for canning and to make fresh salsa and tomato juice.

FALL QUILT SHOW

The Rocky Mountain Quilt Museum will display an exhibit of quilts at Echter's from Friday, October

Tips from the pros.

OUR PLANT DOCTORS ARE AVAILABLE 7 DAYS A WEEK TO ANSWER YOUR GARDENING QUESTIONS. FOR AN ACCURATE DIAGNOSIS, IT HELPS TO BRING IN A SAMPLE.

FLOWER GARDENS

Pansies planted this month will stay in bloom until the ground freezes. Mulch them for winter protection, and these hardy pansies will be back in flower when the warm days of spring return. They are great companions for spring-flowering bulbs.

Dig up and store tender bulbs in moistened vermiculite or peat moss in a cool area and protect them from freezing in the winter.

BULBS

The best selection of bulbs is available now. Don't forget bulb food or super phosphate when planting your tulips, daffodils, crocus, and other spring-flowering bulbs.

LAWNS

Lawns grow best in spring and fall. Fertilize your lawn with Green Thumb Lawn Fertilizer by mid-September. Green Thumb Winterizer should be applied in mid-October.

Bindweed, dandelion, and other perennial weeds will be moving food reserves down to their roots. Use Weed Free Zone to kill these invasive weeds, roots and all.

PERENNIALS & ROSES

September is a great time to plant perennials. The cooler temperatures and warm soils allow rooting to take place.

Remove any foliage from your roses with fungal diseases such as powdery mildew and rust. Discard in the trash. Cleaning up now will help prevent a recurrence of the problem next year.

VEGETABLE GARDENS

Gently turn pumpkins and gourds to prevent soft spots. Place 3–4" of straw under your pumpkins to prevent damage to the bottoms.

Before first frost, dig up herbs like chives, rosemary, and parsley. Place them indoors in pots in a south-facing window for fresh herbs all winter.

When frost threatens, pick green tomatoes and place them in a single layer in a cardboard box—ensuring they do not touch each other.

Cover with newspaper, and store boxes in a cool, dark place. Check them frequently, as they will ripen sporadically.

INDOOR PLANTS

If you had your indoor plants outside for the summer check your plants carefully for insects (under the leaves and in the soil) before you bring them indoors.

Plant amaryllis bulbs by the end of September for blooms at Christmas.

TREES & SHRUBS

Avoid excessive pruning of trees and shrubs because pruning encourages new growth. Plants should harden off before going into dormancy for the winter.

If you had insect problems on your trees and shrubs—whether they be aphids or borers—an application of a systemic insecticide like Ferti-lome Tree and Shrub Systemic Insect Drench will greatly reduce their population. Apply this fall, and your plants will be protected for a whole year.

FEATHERED FRIENDS

Continue to supply your hummingbird feeders for the fall migration.

MISCELLANEOUS

Stay warm outside in the cooler fall evenings with a chiminea or fire pit. These outdoor fireplaces will keep you warm and cozy while grilling or entertaining.
